grasp what it means to be a child today! We grew up yesterday. The planes and radios which had startled our parents were com-

monplace to us. Television and jets we could take in stride. But Space! Who among us expected to live in a Buck Rogers era? Yet to our youngsters nothing seems more natural than man's invasion of the universe. Everything that went before was preparation. We are ready to blast off. And the man who will establish our first colony on Mars is prob-

ably training for his mission in a sixth grade Was there ever a time when religious, moral and spiritual development were more essential to our youth? The Truth man will cherish on Earth, and carry with him among the stars, is being taught every Sunday in our churches. Is your child . . . and the home in which he is growing up . . . FIT FOR THE AGE?
